BUBBL

THE BEGLEY ULTIMATE BBL

The BUBBL broad band light system enhances IPL technology with superior durability, precision, and versatility. BUBBL effectively addresses diverse skin concerns, ensuring optimal performance and client satisfaction at a cost efficient rate.

DIVERSE APPLICATION

Filters eliminate wavelengths below 1200nm, unlocking access to versatile treatment options such as collagen stimulation, vein removal, pigment reduction and acne bacteria destruction.

KEY FEATURES

UNPARALLED FLASHLAMP LONGEVITY

Two standard handpieces with flashlamps guaranteed for 500,000 pulses (1 million total) compared to the industry average of 35,000. This extended lifespan ensures consistent energy output, reducing downtime and costs.

COLLATED FILTERS FOR PRECISION

Stackable filters provide focused and controlled energy output, allowing tailored treatments with superior filtration. Magnetically secured for easy removal.

CUSTOMIZABLE TREATMENT AREAS

Additional filters limit the treatment focal point to 12x12mm or 12x20mm, offering flexibility for varying clients needs.
